

OVERVIEW:

Detroit eFill chargers are engineered for ultimate reliability in the most demanding conditions. Customizable charging configurations offer the efficiency and seamless integration you expect from Detroit, providing exceptional value for your EV infrastructure.

The eFill Standard Dispenser features a slim form factor with a detailed user interface and cables that deliver up to 300 amps of current.

Maximum continuous current CCS [A]	200	300
Power Range [kW]	up to 80kW [1]	up to 120kW [1]
Voltage range [V]	150 - 1000	
Available connectors	Single and Dual CCS1	
Interface	"10" Touchscreen Emergency stop pushbutton	
Protections	Isolation monitor	
Cable length [ft]	16.4 with cable management system (optionally, 25)	
Degree of protection	NEMA 3R	
Operating Temperature [°F]	From -22 to 122	
Relative humidity	From 4% to 95%	
Maximum altitude (above sea level) [ft]	≤ 6,561 without derating (max. 9,842)	
Dimensions (W x D x H) [ft]	1.0 x 1.6 x 5.9	
Regulations	UL 2202, NEC 625, FCC Part 15 Class A
