

DETROIT CONNECT

PRODUCT OVERVIEW

Virtual Technician translates fault data into practical intelligence. With real-time service support, your trucks will spend less time in the shop and more time getting the job done.

Remote Updates allows you to make select engine parameter changes for eligible Daimler trucks in your fleet – all from the Detroit Connect portal..

Analytics tracks driver safety and improves vehicle performance. Helping you to quickly identify behaviors, trends, root causes and key insights on operating efficiency and safety risks across your fleet.

DETROIT CONNECT

*On-demand intelligence to
take your fleet further.*

Turning data into insights.

The Detroit Connect® suite of connected vehicle services makes it easy for fleets and owner-operators to manage truck health, performance and driver safety. Collecting real-time data and delivering actionable information to help you maximize uptime, Detroit Connect provides all the details you need to make critical business decisions.

The suite of services includes Virtual Technician®, Remote Updates and Analytics.

Turning insights into uptime.

Detroit Connect services are delivered via the proprietary connectivity platform. To view real-time fault and performance data on the Detroit Connect Portal, you can create an account at hq.detroitconnect.com/DTPortal/signup.

Connectivity solutions.

Detroit Connect leverages smart technology to provide a connected experience for fleets – making it easy to remotely manage operations and giving drivers the flexibility to access all apps from one central location.
